PROFESSIONAL SUMMARY

Detail-oriented Data Analyst and Business Intelligence Developer experienced in delivering data-driven solutions for clients. Proficient in SQL, Power BI, Advanced Excel, and Python for data cleaning, ETL workflows, and interactive dashboard design. Proven track record of analyzing large datasets exceeding 7,000 records and reducing reporting time by 30 percent to drive business decision-making.

SKILLS

- Python Data Analysis (Pandas, NumPy)
- SQL Server & Database Querying
- Power BI & Interactive Dashboards
- ETL Processes & Data Warehousing
- Exploratory Data Analysis (EDA)
- Data Modeling & DAX Formulas
- Advanced Microsoft Excel
- Git & GitHub Version Control
- Statistical Analysis Methods
- Technical Proposal Writing

WORK HISTORY

Freelance Data Analyst & BI Developer *(08/2025 – Present)*

Mostaql Platform - Assiut, Egypt

- Reduced client reporting time by 30 percent through the design and deployment of interactive Power BI dashboards.
- Managed end-to-end ETL workflows using Python and SQL to extract, clean, and structure complex datasets for statistical analysis.
- Drafted comprehensive technical proposals detailing SQL database structuring, data cleaning workflows, and analytical solutions.

Data Analyst - Sales Team (Summer Training Program) *(2026)*

Dream 2000, Retail Sales Department - Assiut, Egypt

- Worked directly within the Retail Sales team for three months, building a hands-on, ground-level understanding of sales performance drivers, customer behavior, and branch operations.
- Applied that field knowledge as a Data Analyst to design and build an interactive Power BI dashboard for the team, translating raw sales data into clear KPIs and visualizations.
- Structured the dashboard to help the sales team track their performance, identify weak points, and prioritize the areas most in need of focus.
- Combined direct sales-floor exposure with data analysis skills to ensure the dashboard's metrics reflected what actually mattered to the team's day-to-day decisions.

PROJECTS

Amazon Sales & Performance Analysis [Link]

- Performed ETL and data wrangling on 1,000 products across 28 categories using Python for Exploratory Data Analysis.
- Developed a professional Power BI dashboard to clearly visualize KPIs, category performance, and sales distributions.

Telecom Customer Churn Analysis Dashboard [Link]

- Engineered relational data models and formulas to analyze 7,043 customer records, applying SQL logic to identify churn drivers.
- Designed an interactive Power BI dashboard featuring advanced visualizations to map correlations between tenure, monthly charges, and churn.

Supermarket Sales Analysis Dashboard [Link]

- Cleaned and structured sales datasets comprising 5,010 individual orders using Python to ensure data accuracy and reliability.
- Built an interactive Power BI dashboard to effectively track sales trends, branch performance, and core retail metrics.

EDUCATION

Bachelor of Information Technology *(Expected Graduation: 2029)*
New Assiut Technological University - Assiut, Egypt

High School Diploma in AI and IoT *(Graduated: 2025)*
Ahmed Deif Allah International Applied Tech School - Assiut, Egypt

- Achieved 95 percent final grade; secured 3rd place at GDG Assiut Competition and school-level AI Capstone Project.

CERTIFICATIONS

- Data Analysis Track – Digital Egypt Cubs Initiative by Udacity and MCIT (2024) [Link]
- Advanced Excel Skills Training – IT SPARK and School to Work Transition Unit (2023) [Link]
- Summer Training Program Certificate of Completion – Dream 2000, Retail Sales Department (2026) [Link]
